## STANDARD DIMENSIONAL TOLERANCES ON JOONGPOL PRODUCTS

Taking into account the production technology, the following standard tolerances are established on the products. These tolerances can be tightened in case of special customer requirements. If a client has special requirements for a product, we approach it individually and set tolerances for a specific product individually, making any necessary changes in the manufacturing technology.

### PE / XPE:

DENSITY:  $\pm 10\%$

The thickness tolerance results from the thickness and type of board (material) from which the fitting is manufactured.

Tolerances on other dimensions:  $\pm 2$  mm.
